SSD

6/24/10
10-6-5

I support CCAEJ and the communities who are heavily impacted by diesel emissions from rail industry operations. CARB must use its authority to enact enforceable regulations that will achieve the maximum possible reductions to protect public health. As Chair of the Board, your direction is critical. You have the opportunity to stand out as a leader and make a significant positive impact on the health and well-being of communities adjacent to rail facilities.
